SUBJECT INDEX
VOLUME 38, PART II

A

Accelerated Tests.

A Machine for Testing Highway Subgrade Soils. E. O. Rhodes, 551. Discussion, 573.

Some Applications of an Accelerated Test for Determining the Chemical Stability of Lubricating Greases. F. L. Wright and H. A. Mills, 525. Discussion, 538.

Studies in the Oxidation of Mineral Transformer Oil. F. M. Clark, 507. Discussion, 520.

Aggregate.

Drying Shrinkage of Concrete as Affected by Many Factors. Roy W. Carlson, 419. Discussion, 438.

The Effect of Using a Blend of Portland and Natural Cement on Physical Properties of Mortar and Concrete. W. F. Kellermann and D. G. Runner, 329. Discussion, 351.

A Study of Fine Aggregate in Freshly Mixed Mortars and Concretes. C. A. G. Weymouth, 354. Discussion, 373.

Alloy Steel.

An Investigation of the Effects of Elevated Temperatures on the Fatigue Properties of Two Alloy Steels. J. S. Kinney, 197.

Surface Cracks on Large 18 per cent Chromium, 8 per cent Nickel Alloy Steel Castings. Peter R. Kosting. Published in *ASTM Bulletin*, No. 93, August, 1938, p. 17.

Alloys.

Compressive, Impact, and Other Mechanical Properties of Nickel and Some of Its High-Strength, Corrosion-Resisting Alloys. Charles F. Catlin and W. A. Mudge, 269. Discussion, 277.

Aluminum.

Secondary Radiation in the Radiography of Aluminum, Steel, and Lead. Herman E. Seemann, 284.

Apparatus.

See **Testing Apparatus.**

Arc Source.

An Arc Source for Quantitative Spectral Analysis. C. J. Neuhaus, 279. Discussion, 282.

Asphalt.

Adherence of Organic Coatings to Metals. A. E. Schuh, 484. Discussion, 495.

Effect of Sulfur upon Some of the Properties of Asphalts. Isaac Bencowitz and E. S. Boe, 539. Discussion, 548.

Automobiles.

Utility and Non-Standard Impact Testing. Sam Tour, 25. Discussion, 37.

B

Bituminous Materials.

See **Asphalt.**

Blended Cement.

The Effect of Using a Blend of Portland and Natural Cement on Physical Properties of Mortar and Concrete. W. F. Kellermann and D. G. Runner, 329. Discussion, 351.

Boiler Water.

See **Water.**

Bond.

Some Factors Influencing the Bond Between Concrete and Reinforcing Steel. Raymond E. Davis, Elwood H. Brown, and J. W. Kelly, 394. Discussion, 407.

Boundary Effect.

A Study of Fine Aggregate in Freshly Mixed Mortars and Concretes. C. A. G. Weymouth, 354. Discussion, 373.

Brick.

Freezing-and-Thawing Tests for Building Brick. J. W. McBurney and A. R. Eberle 470.

Brinell Hardness.

See **Hardness Testing.**

Brittleness.
Effect of Sulfur upon Some of the Properties of Asphalts. Isaac Bencowitz and E. S. Boe, 539. Discussion, 548.
Some Considerations on the Impact Testing Problem. N. Davidenkoff, 135.
The Theory of Impact Testing: Influence of Temperature, Velocity of Deformation, and Form and Size of Specimen on Work of Deformation. D. J. McAdam, Jr., and R. W. Clyne, 112. Discussion, 133.

C

Cast Iron.
The Effect of Overstressing and Understressing in Fatigue. J. B. Kommers, 249. Discussion, 263.
Effect of Size and Type of Specimen on the Torsional Properties of Cast Iron. Jasper O. Draffin and W. L. Collins, 235. Discussion, 243.
Note on the Hardness Measurements of Very Hard Steels and White Cast Irons. J. S. Vanick and J. T. Eash, 202. Discussion, 211.
Castings.
Radiography in Industry. H. H. Lester. Published in *ASTM Bulletin*, No. 94, October, 1938, p. 5.
Some Pros and Cons of Radiography. G. C. McCormick. Published in *ASTM Bulletin*, No. 95, December, 1938, p. 25.
Surface Cracks on Large 18 per cent Chromium, 8 per cent Nickel Alloy Castings. Peter R. Kosting. Published in *ASTM Bulletin*, No. 93, August, 1938, p. 17.
Cement.
Drying Shrinkage of Concrete as Affected by Many Factors. Roy W. Carlson, 419. Discussion, 438.
The Effect of Using a Blend of Portland and Natural Cement on Physical Properties of Mortar and Concrete. W. F. Kellermann and D. G. Runner, 329. Discussion, 351.
Studies of the Operation of the Wagner Turbidimeter. H. S. Ponzer and D. R. MacPherson, 441. Discussion, 456.
Charpy Impact.
See **Impact Testing.**
Chromium Steel.
See **Alloy Steel.**
Clay.
Important Considerations in Soil Mechanics. C. A. Hogentogler and Harold Allen. Published in *ASTM Bulletin*, No. 94, October, 1938, p. 15. Discussion, p. 19.
Compression Testing.
Compressive, Impact, and Other Mechanical Properties of Nickel and Some of Its High-Strength, Corrosion-Resisting Alloys. Charles F. Catlin and W. A. Mudge, 269. Discussion, 277.
Physical Properties of Four Low-Alloy High-Strength Steels. W. L. Collins and T. J. Dolan, 157. Discussion, 172.
Recent Developments in European Research on Fatigue of Metals. Richard P. Seelig. Published in *ASTM Bulletin*, No. 94, October, 1938, p. 23; No. 95, December, 1938, p. 15. Discussion, No. 95, December, 1938, p. 22.
Short-Time Creep Tests of Concrete in Compression. Russell S. Jensen and Frank E. Richart, 410. Discussion, 418.
Some Factors Influencing the Bond Between Concrete and Reinforcing Steel. Raymond E. Davis, Elwood H. Brown, and J. W. Kelly, 394. Discussion, 407.
Concrete.
Drying Shrinkage of Concrete as Affected by Many Factors. Roy W. Carlson, 419. Discussion, 438.
The Effect of Using a Blend of Portland and Natural Cement on Physical Properties of Mortar and Concrete. W. F. Kellermann and D. G. Runner, 329. Discussion, 351.
Measuring Young's Modulus of Elasticity by Means of Sonic Vibrations. T. C. Powers, 460. Discussion, 468.
Short-Time Creep Tests of Concrete in Compression. Russell S. Jensen and Frank E. Richart, 410. Discussion, 418.
Some Factors Influencing the Bond Between Concrete and Reinforcing Steel. Raymond E. Davis, Elwood H. Brown, and J. W. Kelly, 394. Discussion, 407.
A Study of Fine Aggregate in Freshly Mixed Mortars and Concretes. C. A. G. Weymouth, 354. Discussion, 373.
Utility and Non-Standard Impact Testing. Sam Tour, 25. Discussion, 37.

Consistency.
A Machine for Testing Highway Subgrade Soils. E. O. Rhodes, 551. Discussion, 573.
A Study of Fine Aggregate in Freshly Mixed Mortars and Concretes. C. A. G. Weymouth, 354. Discussion, 373.
Corrosion.
Physical Properties of Four Low-Alloy High-Strength Steels. W. L. Collins and T. J. Dolan, 157. Discussion, 172.
Recent Developments in European Research on Fatigue of Metals. Richard P. Seelig. Published in *ASTM Bulletin*, No. 95, December, 1938, p. 15. Discussion, p. 22.
Corrosion-Resisting Alloys.
Compressive, Impact, and Other Mechanical Properties of Nickel and Some of Its High-Strength, Corrosion-Resisting Alloys. Charles F. Catlin and W. A. Mudge, 269. Discussion, 277.
Cracking.
Surface Cracks on Large 18 per cent Chromium, 8 per cent Nickel Alloy Castings. Peter R. Kosting. Published in *ASTM Bulletin*. No. 93, August, 1938, p. 17.
Creep.
Actual Grain Size Related to Creep Strength of Steels at Elevated Temperatures. S. H. Weaver, 176. Discussion, 182.
Short-Time Creep Tests of Concrete in Compression. Russell S. Jensen and Frank E. Richart, 410. Discussion, 418.
Crushing Strength.
The Effect of Using a Blend of Portland and Natural Cement on Physical Properties of Mortar and Concrete. W. F. Kellermann and D. G. Runner, 329. Discussion, 351.
Crystallization.
Rosin Crystallization—a Discussion of the Theory Underlying Crystallization Applied to Rosin. E. A. Georgi, 498. Discussion, 505.

D

Deflocculating Agents.
A Study of Deflocculating Agents Used in the Particle Size Determination of Soils. Edward E. Bauer, 575.
Density.
The Grading-Density Relations of Granular Materials. Donald M. Burmister, 587. Discussion, 597.
Ductility.
Physical Properties of Four Low-Alloy High-Strength Steels. W. L. Collins and T. J. Dolan, 157. Discussion, 172.
The Theory of Impact Testing: Influence of Temperature, Velocity of Deformation, and Form and Size of Specimen on Work of Deformation. D. J. McAdam, Jr., and R. W. Clyne, 112. Discussion, 133.
Dynamic Tests.
Measuring Young's Modulus of Elasticity by Means of Sonic Vibrations. T. C. Powers, 460. Discussion, 468.

E

Effect of Temperature.
See **Temperature, Effect of.**
Elasticity.
See also **Compression Testing; Tension Testing.**
Measuring Young's Modulus of Elasticity by Means of Sonic Vibrations. T. C. Powers, 460. Discussion, 468.
Embrittlement.
A Method for the Embrittlement Testing of Boiler Waters. Frederick G. Straub and T. A. Bradbury, 602. Discussion, 616.
Enamel.
Utility and Non-Standard Impact Testing. Sam Tour, 25. Discussion, 37.
Endurance Testing.
See **Fatigue.**
Exchange Filters.
Removal of Dissolved Salts from Water by Exchange Filters. P. G. Bird, 631. Discussion, 637.
Exposure Tests.
See **Weathering.**

F

Fatigue.
The Effect of Overstressing and Understressing in Fatigue. J. B. Kommers, 249. Discussion, 263.
An Investigation of the Effects of Elevated Temperatures on the Fatigue Properties of Two Alloy Steels. J. S. Kinney, 197.
Physical Properties of Four Low-Alloy High-Strength Steels. W. L. Collins and T. J. Dolan, 157. Discussion, 172.

Fatigue (*Continued*):
Recent Developments in European Research on Fatigue of Metals. Richard P. Seelig. Published in *ASTM Bulletin*, No. 94, October, 1938, p. 23; No. 95, December, 1938, p. 15. Discussion, No. 95, December, 1938, p. 22.

Fiber Board.
Utility and Non-Standard Impact Testing. Sam Tour, 25. Discussion, 37.

Film.
Important Considerations in Soil Mechanics. C. A. Hogentogler and Harold Allen. Published in *ASTM Bulletin*, No. 94, October, 1938, p. 15. Discussion, p. 19.

Filters.
Removal of Dissolved Salts from Water by Exchange Filters. P. G. Bird, 631. Discussion, 637.

Flexure Testing.
Effect of Sulfur upon Some of the Properties of Asphalts. Isaac Bencowitz and E. S. Boe, 539. Discussion, 548.
The Effect of Using a Blend of Portland and Natural Cement on Physical Properties of Mortar and Concrete. W. F. Kellermann and D. G. Runner, 329. Discussion, 351.

Flow.
Summary of Proceedings of the Rochester Regional Meeting—Symposium on Plastics, 1.

Freezing-and-Thawing Tests.
The Effect of Using a Blend of Portland and Natural Cement on Physical Properties of Mortar and Concrete. W. F. Kellermann and D. G. Runner, 329. Discussion, 351.
Freezing-and-Thawing Tests for Building Brick. J. W. McBurney and A. R. Eberle, 470.
A Machine for Testing Highway Subgrade Soils. E. O. Rhodes, 551. Discussion, 573.
Some Factors Influencing the Bond Between Concrete and Reinforcing Steel. Raymond E. Davis, Elwood H. Brown, and J. W. Kelly, 394. Discussion, 407.

G

Gamma-Ray.
Gamma-Ray Radiography. Gilbert E. Doan and Shang-Shoa Young, 292
A Study of Intensifying Screens for Gamma-Ray Radiography. Charles W. Briggs and Roy A. Gezelius, 303. Discussion, 314.

Gears.
Utility and Non-Standard Impact Testing. Sam Tour, 25. Discussion, 37.

Grading-Density Relation.
The Grading-Density Relations of Granular Materials. Donald M. Burmister, 587. Discussion, 597.

Grain Size.
Actual Grain Size Related to Creep Strength of Steels at Elevated Temperatures. S. H. Weaver, 176. Discussion, 182.
The Examination of Metals in Polarized Light. L. V. Foster and J. E. Wilson, 315.

Grease.
Some Applications of an Accelerated Test for Determining the Chemical Stability of Lubricating Greases. F. L. Wright and H. A. Mills, 525. Discussion, 538.

H

Hardness Testing.
Compressive, Impact, and Other Mechanical Properties of Nickel and Some of Its High-Strength, Corrosion-Resisting Alloys. Charles F. Catlin and W. A. Mudge, 269. Discussion, 277.
Note on the Hardness Measurements of Very Hard Steels and White Cast Irons. J. S. Vanick and J. T. Eash, 202. Discussion, 211.
Summary of Proceedings of the Rochester Regional Meeting—Symposium on Plastics, 1.
The Use of the Charpy Test as a Method of Evaluating Toughness Adjacent to Welds. Walter H. Bruckner, 71. Discussion, 91.

Heat Treatment.
The Properties and Uses of Chilled Iron. S. C. Massari, 217. Discussion, 233.

High Temperature Testing.
See **Temperature, Effect of.**

I

Impact Testing.
Compressive, Impact, and Other Mechanical Properties of Nickel and Some of Its High-Strength, Corrosion-Resisting Alloys. Charles F. Catlin and W. A. Mudge, 269. Discussion, 277.
Physical Properties of Four Low-Alloy High-Strength Steels. W. L. Collins and T. J. Dolan, 157. Discussion, 172.

Symposium on Impact Testing:
Introduction. M. F. Sayre and Walter W. Werring, 21.
Utility and Non-Standard Impact Testing. Sam Tour, 25. Discussion, 37.
The Impact Testing of Plastics. Robert Burns and Walter W. Werring, 39. Discussion, 53.
Practical Application of the Notched-Bar Impact Test. G. C. Riegel and F. F. Vaughn, 60. Discussion, 67.
The Use of the Charpy Test as a Method of Evaluating Toughness Adjacent to Welds. Walter H. Bruckner, 71. Discussion, 91.
Stress-Strain Relations Under Tension Impact Loading. D. S. Clark and G. Dätwyler, 98. Discussion, 107.
The Theory of Impact Testing: Influence of Temperature, Velocity of Deformation, and Form and Size of Specimen on Work of Deformation. D. J. McAdam, Jr., and R. W. Clyne, 112. Discussion, 133.
Some Considerations on the Impact Testing Problem. N. Davidenkoff, 135.
Impact Tests of Welded Joints—II: A Review of the Literature from January 1, 1936, to January 1, 1938. W. Spraragen and G. E. Claussen, 140.
Notched-Bar Testing and Impact Testing. S. L. Hoyt, 141.

Instruments.
See **Testing Apparatus.**

Intensifying Screens.
A Study of Intensifying Screens for Gamma-Ray Radiography. Charles W. Briggs and Roy A. Gezelius, 303. Discussion, 314.

Iron.
The Effect of Overstressing and Understressing in Fatigue. J. B. Kommers, 249. Discussion, 263.
Effect of Size and Type of Specimen on the Torsional Properties of Cast Iron. Jasper O. Draffin and W. L. Collins, 235. Discussion, 243.
Note on the Hardness Measurements of Very Hard Steels and White Cast Irons. J. S. Vanick and J. T. Eash, 202. Discussion, 211.
The Properties and Uses of Chilled Iron. S. C. Massari, 217. Discussion, 233.

Izod Impact.
See **Impact Testing.**

L

Lacquer.
Adherence of Organic Coatings to Metals. A. E. Schuh, 484. Discussion, 495.

Lead.
Secondary Radiation in the Radiography of Aluminum, Steel, and Lead. Herman E. Seemann, 284.

Lead Screens.
A Study of Intensifying Screens for Gamma-Ray Radiography. Charles W. Briggs and Roy A. Gezelius, 303. Discussion, 314.

Low Temperature Testing.
See **Temperature, Effect of.**

Lubricants.
Some Applications of an Accelerated Test for Determining the Chemical Stability of Lubricating Greases. F. L. Wright and H. A. Mills, 525. Discussion, 538.

M

Marburg Lecture.
The Torsion Test. Edgar Marburg Lecture. Albert Sauveur, 3.

Mechanical Analyses.
A Machine for Testing Highway Subgrade Soils. E. O. Rhodes, 551. Discussion, 573.
Studies of the Operation of the Wagner Turbidimeter. H. S. Ponzer and D. R. MacPherson, 441. Discussion, 456.
A Study of Deflocculating Agents Used in the Particle Size Determination of Soils. Edward E. Bauer, 575.

Metallography.
Actual Grain Size Related to Creep Strength of Steels at Elevated Temperatures. S. H. Weaver, 176. Discussion, 182.
The Examination of Metals in Polarized Light. L. V. Foster and J. E. Wilson, 315.
The Properties and Uses of Chilled Iron. S. C. Massari, 217. Discussion, 233.
Surface Cracks on Large 18 per cent Chromium, 8 per cent Nickel Alloy Steel Castings. Peter R. Kosting. Published in *ASTM Bulletin*, No. 93, August, 1938, p. 17.
The Use of the Charpy Test as a Method of Evaluating Toughness Adjacent to Welds. Walter H. Bruckner, 71. Discussion, 91.

Moisture, Effect of.
The Impact Testing of Plastics. Robert Burns and Walter W. Werring, 39. Discussion, 53.

Monel Metal.
Compressive, Impact, and Other Mechanical Properties of Nickel and Some of Its High-Strength, Corrosion-Resisting Alloys. Charles F. Catlin and W. A. Mudge, 269. Discussion, 277.

Mortars.
The Effect of Using a Blend of Portland and Natural Cement on Physical Properties of Mortar and Concrete. W. F. Kellermann and D. G. Runner, 329. Discussion, 351.
Measuring Young's Modulus of Elasticity by Means of Sonic Vibrations. T. C. Powers, 460. Discussion, 468.
A Study of Fine Aggregate in Freshly Mixed Mortars and Concretes. C. A. G. Weymouth, 354. Discussion, 373.

N

Nickel Alloys
Compressive, Impact, and Other Mechanical Properties of Nickel and Some of Its High-Strength, Corrosion-Resisting Alloys. Charles F. Catlin and W. A. Mudge, 269. Discussion, 277.
Surface Cracks on Large 18 per cent Chromium, 8 per cent Nickel Alloy Steel Castings. Peter R. Kosting. Published in *ASTM Bulletin*, No. 93, August, 1938, p. 17.

Notched-Bar Testing.
The Effect of Overstressing and Understressing in Fatigue. J. B. Kommers, 249. Discussion, 263.
The Impact Testing of Plastics. Robert Burns and Walter W. Werring, 39. Discussion, 53.
Impact Tests of Welded Joints—II: A Review of the Literature from January 1, 1936, to January 1, 1938. W. Spraragen and G. E. Claussen, 140.
Notched-Bar Testing and Impact Testing. S. L. Hoyt, 141.
Physical Properties of Four Low-Alloy High-Strength Steels. W. L. Collins and T. J. Dolan, 157. Discussion, 172.
Practical Application of the Notched-Bar Impact Test. G. C. Riegel, and F. F. Vaughn 60. Discussion, 67.
The Theory of Impact Testing: Influence of Temperature, Velocity of Deformation, and Form and Size of Specimen on Work of Deformation. D. J. McAdam, Jr., and R. W. Clyne, 112. Discussion, 133.

O

Oil.
Adherence of Organic Coatings to Metals. A. E. Schuh, 484. Discussion, 495.
Studies in the Oxidation of Mineral Transformer Oil. F. M. Clark, 507. Discussion, 520.

Organic Coatings.
Adherence of Organic Coatings to Metals. A. E. Schuh, 484. Discussion, 495.

Overstressing.
The Effect of Overstressing and Understressing in Fatigue. J. B. Kommers, 249. Discussion, 263.

Oxidation.
Some Applications of an Accelerated Test for Determining the Chemical Stability of Lubricating Greases. F. L. Wright and H. A. Mills, 525. Discussion, 538.
Studies in the Oxidation of Mineral Transformer Oil. F. M. Clark, 507. Discussion, 520.

P

Paint.
Adherence of Organic Coatings to Metals. A. E. Schuh, 484. Discussion, 495.

Particle Size.
The Grading-Density Relations of Granular Materials. Donald M. Burmister, 587. Discussion, 597.
Studies of the Operation of the Wagner Turbidimeter. H. S. Ponzer and D. R. MacPherson, 441. Discussion, 456.
A Study of Deflocculating Agents Used in the Particle Size Determination of Soils. Edward E. Bauer, 575.

Penetration.
Effect of Sulfur upon Some of the Properties of Asphalts. Isaac Bencowitz and E. S. Boe, 539. Discussion, 548.

Permanence.
Summary of Proceedings of the Rochester Regional Meeting—Symposium on Plastics, 1.

Pipe.
Utility and Non-Standard Impact Testing. Sam Tour, 25. Discussion, 37.

Plastics.
The Impact Testing of Plastics. Robert Burns and Walter W. Werring, 39. Discussion, 53.
Summary of Proceedings of the Rochester Regional Meeting—Symposium on Plastics, 1.

Polarized Light.
The Examination of Metals in Polarized Light. L. V. Foster and J. E. Wilson, 315.

R

Radiography.
Gamma-Ray Radiography. Gilbert E. Doan and Shang-Shoa Young, 292.
Radiography in Industry. H. H. Lester. Published in *ASTM Bulletin*, No. 94, October, 1938, p. 5.
Secondary Radiation in the Radiography of Aluminum, Steel, and Lead. Herman E. Seemann, 284.
Some Pros and Cons of Radiography. G. C. McCormick. Published in *ASTM Bulletin*, No. 95, December, 1938, p. 25.
A Study of Intensifying Screens for Gamma-Ray Radiography. Charles W. Briggs and Roy A. Gezelius, 303. Discussion, 314.

Rails.
Utility and Non-Standard Impact Testing. Sam Tour, 25. Discussion, 37.

Regional Meeting Papers.
Summary of Proceedings of the Rochester Regional Meeting—Symposium on Plastics, 1.

Relative Humidity.
The Impact Testing of Plastics. Robert Burns and Walter W. Werring, 39. Discussion, 53.

Rockwell Hardness.
See **Hardness Testing.**

Rollers.
Utility and Non-Standard Impact Testing. Sam Tour, 25. Discussion, 37.

Rosin.
Rosin Crystallization—a Discussion of the Theory Underlying Crystallization Applied to Rosin. E. A. Georgi, 498. Discussion, 505.

S

Salts.
Removal of Dissolved Salts from Water by Exchange Filters. P. G. Bird, 631. Discussion, 637.

Sand.
The Grading-Density Relations of Granular Materials. Donald M. Burmister, 587. Discussion, 597.
Important Considerations in Soil Mechanics. C. A. Hogentogler and Harold Allen. Published in *ASTM Bulletin*, No. 94, October, 1938, p. 15. Discussion, p. 19.
A Study of Fine Aggregate in Freshly Mixed Mortars and Concretes. C. A. G. Weymouth, 354. Discussion, 373.

Scleroscope Hardness.
See **Hardness Testing.**

Screens.
A Study of Intensifying Screens for Gamma-Ray Radiography. Charles W. Briggs and Roy A. Gezelius, 303. Discussion, 314.

Secondary Radiation.
Secondary Radiation in the Radiography of Aluminum, Steel, and Lead. Herman E. Seemann, 284.

Shear Test.
Important Considerations in Soil Mechanics. C. A. Hogentogler and Harold Allen. Published in *ASTM Bulletin*, No. 94, October, 1938, p. 15. Discussion, p. 19.

Shrinkage.
Drying Shrinkage of Concrete as Affected by Many Factors. Roy W. Carlson, 419. Discussion, 438.

Sludge.
Studies in the Oxidation of Mineral Transformer Oil. F. M. Clark, 507. Discussion, 520.

Softening Point.
Effect of Sulfur upon Some of the Properties of Asphalts. Isaac Bencowitz and E. S. Boe, 539. Discussion, 548.
Summary of Proceedings of the Rochester Regional Meeting—Symposium on Plastics, 1.

Soils.
The Grading-Density Relations of Granular Materials. Donald M. Burmister, 587. Discussion, 597.
Important Considerations in Soil Mechanics. C. A. Hogentogler and Harold Allen. Published in *ASTM Bulletin*, No. 94, October, 1938, p. 15. Discussion, p. 19.
A Machine for Testing Highway Subgrade Soils. E. O. Rhodes, 551. Discussion, 573.
A Study of Deflocculating Agents Used in the Particle Size Determination of Soils. Edward E. Bauer, 575.

Sonic Vibrations.
Measuring Young's Modulus of Elasticity by Means of Sonic Vibrations. T. C. Powers, 460. Discussion, 468.

Spectrographic Analysis.
An Arc Source for Quantitative Spectral Analysis. C. J. Neuhaus, 279. Discussion, 282.

Stability.
Effect of Sulfur upon Some of the Properties of Asphalts. Isaac Bencowitz and E. S. Boe, 539. Discussion, 548.
Stainless Steel.
See **Alloy Steel.**
Statistical Methods.
Statistical Methods as an Aid in Revising Specifications. N. C. Wiley, 647. Discussion, 655.
Steel.
Actual Grain Size Related to Creep Strength of Steels at Elevated Temperatures. S. H. Weaver, 176. Discussion, 182.
The Effect of Overstressing and Understressing in Fatigue. J. B. Kommers, 249. Discussion, 263.
An Investigation of the Effects of Elevated Temperatures on the Fatigue Properties of Two Alloy Steels. J. S. Kinney, 197.
Note on the Hardness Measurements of Very Hard Steels and White Cast Irons. J. S. Vanick and J. T. Eash, 202. Discussion, 211.
Physical Properties of Four Low-Alloy High-Strength Steels. W. L. Collins and T. J. Dolan, 157. Discussion, 172.
Secondary Radiation in the Radiography of Aluminum, Steel, and Lead. Herman E. Seemann, 284.
Some Considerations on the Impact Testing Problem. N. Davidenkoff, 135.
Surface Cracks on Large 18 per cent Chromium, 8 per cent Nickel Alloy Steel Castings. Peter R. Kosting. Published in *ASTM Bulletin*, No. 93, August, 1938, p. 17.
The Theory of Impact Testing: Influence of Temperature, Velocity of Deformation, and Form and Size of Specimen on Work of Deformation. D. J. McAdam, Jr., and R. W. Clyne, 112. Discussion, 133.
The Use of the Charpy Test as a Method of Evaluating Toughness Adjacent to Welds. Walter H. Bruckner, 71. Discussion, 91.
Utility and Non-Standard Impact Testing. Sam Tour, 25. Discussion, 37.
Stone.
Utility and Non-Standard Impact Testing. Sam Tour, 25. Discussion, 37.
Strain Gage.
A Level-Bubble Strain Gage. Rex L. Brown. Published in *ASTM Bulletin*, No. 93, August, 1938, p. 16.
Sulfur.
Effect of Sulfur upon Some of the Properties of Asphalts. Isaac Bencowitz and E. S. Boe, 539. Discussion, 548.

T

Temperature, Effect of.
Actual Grain Size Related to Creep Strength of Steels at Elevated Temperatures. S. H. Weaver, 176. Discussion, 182.
An Investigation of the Effects of Elevated Temperatures on the Fatigue Properties of Two Alloy Steels. J. S. Kinney, 197.
The Theory of Impact Testing: Influence of Temperature, Velocity of Deformation, and Form and Size of Specimen on Work of Deformation. D. J. McAdam, Jr., and R. W. Clyne, 112. Discussion, 133.
Tension Testing.
Compressive, Impact, and Other Mechanical Properties of Nickel and Some of Its High-Strength, Corrosion-Resisting Alloys. Charles F. Catlin and W. A. Mudge, 269. Discussion, 277.
Impact Tests of Welded Joints—II: A Review of the Literature from January 1, 1936, to January 1, 1938. W. Spraragen and G. E. Claussen, 140.
Physical Properties of Four Low-Alloy High-Strength Steels. W. L. Collins and T. J. Dolan, 157. Discussion, 172.
Recent Developments in European Research on Fatigue of Metals. Richard P. Seelig. Published in *ASTM Bulletin*, No. 94, October, 1938, p. 23; No. 95, December, 1938, p. 15. Discussion, No. 95, December, 1938, p. 22.
Stress-Strain Relations Under Tension Impact Loading, D. S. Clark and G. Dätwyler, 98. Discussion, 107.
Test Specimen.
Effect of Size and Type of Specimen on the Torsional Properties of Cast Iron. Jasper O. Draffin and W. L. Collins, 235. Discussion, 243.
The Theory of Impact Testing: Influence of Temperature, Velocity of Deformation, and Form and Size of Specimen on Work of Deformation. D. J. McAdam, Jr., and R. W. Clyne, 112. Discussion, 133.
Testing Apparatus.
A Level-Bubble Strain Gage. Rex L. Brown. Published in *ASTM Bulletin*, No. 93, August, 1938, p. 16.

A Machine for Testing Highway Subgrade Soils. E. O. Rhodes, 551. Discussion, 573.
Recent Developments in European Research on Fatigue of Metals. Richard P. Seelig. Published in *ASTM Bulletin*, No. 94, October, 1938, p. 23; No. 95, December, 1938, p. 15. Discussion, No. 95, December, 1938, p. 22.
Studies of the Operation of the Wagner Turbidimeter. H. S. Ponzer and D. R. MacPherson, 441. Discussion, 456.
Utility and Non-Standard Impact Testing. Sam Tour, 25. Discussion, 37.

Testing, Methods of.

An Arc Source for Quantitative Spectral Analysis. C. J. Neuhaus, 279. Discussion, 282.
The Estimation of Sodium in Water Supplies by an Indirect Method. J. B. Romer, W. W. Cerna and H. F. Hannum, 638. Discussion, 642.
The Examination of Metals in Polarized Light. L. V. Foster and J. E. Wilson, 315.
Gamma-Ray Radiography. Gilbert E. Doan and Shang-Shoa Young, 292.
Measuring Young's Modulus of Elasticity by Means of Sonic Vibrations. T. C. Powers, 460. Discussion, 468.
A Method for the Embrittlement Testing of Boiler Waters. Frederick G. Straub and T. A. Bradbury, 602. Discussion, 616.
Radiography in Industry. H. H. Lester. Published in *ASTM Bulletin*, No. 94, October, 1938, p. 5.
Recent Developments in European Research on Fatigue of Metals. Richard P. Seelig. Published in *ASTM Bulletin*, No. 94, October, 1938, p. 23; No. 95, December, 1938, p. 15. Discussion, No. 95, December, 1938, p. 22.
Some Applications of an Accelerated Test for Determining the Chemical Stability of Lubricating Greases. F. L. Wright and H. A. Mills, 525. Discussion, 538.
Some Pros and Cons of Radiography. G. C. McCormick. Published in *ASTM Bulletin*, No. 95, December, 1938, p. 25.
Studies in the Oxidation of Mineral Transformer Oil. F. M. Clark, 507. Discussion, 520.
Summary of Proceedings of the Rochester Regional Meeting—Symposium on Plastics, 1.
Symposium on Impact Testing:
Introduction. M. F. Sayre and Walter W. Werring, 21.
Utility and Non-Standard Impact Testing. Sam Tour, 25. Discussion, 37.
The Impact Testing of Plastics. Robert Burns and Walter W. Werring, 39. Discussion, 53.
Practical Application of the Notched-Bar Impact Test. G. C. Riegel and F. F. Vaughn, 60. Discussion, 67.
The Use of the Charpy Test as a Method of Evaluating Toughness Adjacent to Welds. Walter H. Bruckner, 71. Discussion, 91.
Stress-Strain Relations Under Tension Impact Loading. D. S. Clark and G. Dätwyler, 98. Discussion, 107.
The Theory of Impact Testing: Influence of Temperature, Velocity of Deformation, and Form and Size of Specimen on Work of Deformation. D. J. McAdam, Jr., and R. W. Clyne, 112. Discussion, 133.
Some Considerations on the Impact Testing Problem. N. Davidenkoff, 135.
Impact Tests of Welded Joints—II: A Review of the Literature from January 1, 1936, to January 1, 1938. W. Spraragen and G. E. Claussen, 140.
Notched-Bar Testing and Impact Testing. S. L. Hoyt, 141.
The Torsion Test. Edgar Marburg Lecture. Albert Sauveur, 3.

Textiles.

Progress in Wool Standardization. G. E. Hopkins. Published in *ASTM Bulletin*, No. 93, August, 1938, p. 12.

Thermal Conductivity.

Summary of Proceedings of the Rochester Regional Meeting—Symposium on Plastics, 1.

Tire Chains.

Utility and Non-Standard Impact Testing. Sam Tour, 25. Discussion, 37.

Torsion Testing.

Effect of Size and Type of Specimen on the Torsional Properties of Cast Iron. Jasper O. Draffin and W. L. Collins, 235. Discussion, 243.
Physical Properties of Four Low-Alloy High-Strength Steels. W. L. Collins and T. J. Dolan, 157. Discussion, 172.
The Torsion Test. Edgar Marburg Lecture. Albert Sauveur, 3.

Transformer Oil.
Studies in the Oxidation of Mineral Transformer Oil. F. M. Clark, 507. Discussion, 520.
Transverse Testing.
See **Flexure Testing.**
Tubing.
Utility and Non-Standard Impact Testing. Sam Tour, 25. Discussion, 37.
Turbidimeter.
Studies of the Operation of the Wagner Turbidimeter. H. S. Ponzer and D. R. MacPherson, 441. Discussion, 456.

U

Understressing.
The Effect of Overstressing and Understressing in Fatigue. J. B. Kommers, 249. Discussion, 263.
Utility Testing.
Utility and Non-Standard Impact Testing. Sam Tour, 25. Discussion, 37.

V

Varnish.
Adherence of Organic Coatings to Metals. A. E. Schuh, 484. Discussion, 495.
Vibration Testing.
Measuring Young's Modulus of Elasticity by Means of Sonic Vibrations. T. C. Powers, 460. Discussion, 468.
Vickers Hardness.
See **Hardness Testing.**

W

Water.
The Estimation of Sodium in Water Supplies by an Indirect Method. J. B. Romer, W. W. Cerna and H. F. Hannum, 638. Discussion, 642.
A Method for the Embrittlement Testing of Boiler Waters. Frederick G. Straub and T. A. Bradbury, 602. Discussion, 616.
Removal of Dissolved Salts from Water by Exchange Filters. P. G. Bird, 631. Discussion, 637.
Weathering.
The Effect of Using a Blend of Portland and Natural Cement on Physical Properties of Mortar and Concrete. W. F. Kellermann and D. G. Runner, 329. Discussion, 351.
Freezing-and-Thawing Tests for Building Brick. J. W. McBurney and A. R. Eberle, 470.
Some Factors Influencing the Bond Between Concrete and Reinforcing Steel. Raymond E. Davis, Elwood H. Brown, and J. W. Kelly, 394. Discussion, 407.
Summary of Proceedings of the Rochester Regional Meeting—Symposium on Plastics, 1.
Weld-Quench Test.
The Use of the Charpy Test as a Method of Evaluating Toughness Adjacent to Welds. Walter H. Bruckner, 71. Discussion, 91.
Weld Tests.
Impact Tests of Welded Joints—II: A Review of the Literature from January 1, 1936, to January 1, 1938. W. Spraragen and G. E. Claussen, 140.
Radiography in Industry. H. H. Lester. Published in *ASTM Bulletin*, No. 94, October, 1938, p. 5.
Recent Developments in European Research on Fatigue of Metals. Richard P. Seelig. Published in *ASTM Bulletin*, No. 95, December, 1938, p. 15. Discussion, p. 22.
The Use of the Charpy Test as a Method of Evaluating Toughness Adjacent to Welds. Walter H. Bruckner, 71. Discussion, 91.
White Cast Iron.
Note on the Hardness Measurements of Very Hard Steels and White Cast Irons. J. S. Vanick and J. T. Eash, 202. Discussion, 211.
Wood.
Utility and Non-Standard Impact Testing. Sam Tour, 25. Discussion, 37.
Wool.
Progress in Wool Standardization. G. E. Hopkins. Published in *ASTM Bulletin*, No. 93, August, 1938, p. 12.

X

X-ray.
Radiography in Industry. H. H. Lester. Published in *ASTM Bulletin*, No. 94, October, 1938, p. 5.
Secondary Radiation in the Radiography of Aluminum, Steel, and Lead. Herman E. Seemann, 284.
Some Pros and Cons of Radiography. G. C. McCormick. Published in *ASTM Bulletin*, No. 95, December, 1938, p. 25.
